

### Athletic Clinics for Coaches

Section 1. General. Participation in athletic clinics, on days when school is in session, is limited to the coaching positions listed below:

Grades 7-8 None

Grades 9-12 Head coach and/or one assistant coach

If the head coach is unable to attend the clinic, the building principal may allow another member of the coaching staff for that particular sport to attend. In sports where more than two coaches are involved, the principal may allow one assistant to attend a clinic in that same sport. It would be beneficial for the second coach to attend a different clinic. The decision for number of clinics to be attended and number of coaches to attend will be set by the building principal.

Section 2. Approval. The building principal is responsible for making arrangements for the coaches to participate in an approved clinic. The principal is to forward the regular written conference request form for each clinic to the Superintendent at least three (3) weeks prior to the scheduled date for the clinic.

Note: Coaches who might be teaching in another building must make the original request know to, and receive permission from, the building principal where they are assigned as a teacher before making the request for the Superintendent's approval. The request should have the approval of both principals.

Section 3. Expenses. Expenses for coaches attending these clinics may be paid from the athletic fund of the participating school.

Section 4. Substitute Teachers. If the building principal is unable to make arrangements for covering classes, a substitute teacher may be employed.
